

"The PRO-FIND 25 provides good information on target sizes in cluttered trashy environments, I could easily tell the difference between a potential good coin signal and nearby 'size variable' trash targets."

Field Tester

PRO-FIND

Precision Pinpointing

Locate coins, rings, treasure and gold with speed and accuracy. The PRO-FIND 25 is an essential part of your detecting tool kit.

- Adjustable sensitivity
- Two mode operation
- Durable water resistant construction
- LED flash light
- Detector Interference Free (DIF)

VLF   DIF

World's Best Metal Detection Technologies

PRO-FIND

Precision Pinpointing

Advantages:

Proportional audio/vibration response

For greater accuracy the PRO-FIND 25 indicates the depth of buried targets with a proportional vibration and audio response. As the pinpointer probe gets closer to the target, the intensity of vibration and audio increases.

Adjustable sensitivity

Narrow down the exact location of targets with the PRO-FIND 25's adjustable sensitivity. This can be increased to locate deep targets or decreased to precisely locate small targets.

Two mode operation

Select from two modes – Audio & Vibrate or Vibrate Only for silent searching.

Durable water resistant construction

Submersible probe end. The whole pinpointer can be washed under running water.

Probe side sensitivity

Probe side detection area (360 °) allows targets to easily be located in the walls of the hole.

Auto power off

To save battery life, the PRO-FIND 25 switches off after eight minutes of inactivity.

LED flash light

Easily see targets when pinpointing in low light conditions and in deep holes.

Holster included

Belt mounted holster to comfortably carry pinpointer.

VLF VLF technology

VLF (Very Low Frequency) is a conventional single frequency sine wave transmission technology. This reliable design has greater noise immunity to variable ground conditions.

DIF Detector Interference Free technology

The advanced design of the PRO-FIND 25 removes false signals and noise, commonly associated with other pinpointers. DIF technology eliminates interference with an operating metal detector, when it is switched off, by disengaging the coil's magnetic field.

Length	9.3 in (237 mm)
Diameter	1.6 in (41 mm) base, 0.8 in (20 mm) probe
Weight with Battery	6.82 oz (193.5 g)
Battery	9 volt PP3 (not included)
Battery Life	30 hours nominal (alkaline battery)
Warranty	24 months

Locating Targets

The PRO-FIND 25 pinpointer allows you to accurately locate buried targets in holes, where a metal detector coil doesn't fit. This results in smaller holes, less environmental disruption and faster target recovery time.
