

Metal Detectors

We Change People's Fortunes

What you can find

Found with: CTX 3030

"...the 17 inch coil renewed the site and I reckon I was getting at least 5-6 inches extra depth..."

Jules - UK

Found with: X-TERRA 705

"The Find Liason Officers were able to inform me that it was approximately 700 years old, with an ancient swastika symbol prior to the text."

Steve - UK

Found with: GPX 5000

"In November a friend and me went to the nubian eastern desert. After six days we had nearly an half ounce of nice nuggets in our pocket."

Sacha - Germany

Found with: Excalibur II

"Thanks Minelab, it's a fun, easy and powerful detector! But especially cause from now my girlfriend call me the King of the Sea!"

Greg - Spain

Found with: E-TRAC

"I found 14 silver Talers (German). 30 grams each! I've found them in Germany. 1 week later 12 mediëval coins (1150 AC) in France. Within a month I found 1 golden sovereign in England. What a month!"

Johan - Nethaerlands

Found with: Safari

"I've found in the forest this silver coin. BAVARIA: 1 CRUISER 1805. MAXIMILIANSTRASSE IV JOSEPH (1799 - 1805)"

Oliver - Austria

Where you can find

Getting Started

After buying your detector, decide what you want to find and then do a little research on possible detecting sites. Depending on whether you're looking for rare coins, lost jewellery, gold nuggets or pieces of history will determine where you look and also affect the settings on your detector.

If you like searching for treasure

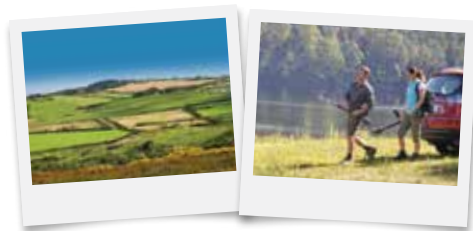

You'll find treasure wherever you look for it! People leave things behind all the time so if you're looking for treasure in the form of coins, artifacts or jewelry, it makes sense to hunt wherever people have been such as:

- Racecourses
- Showgrounds
- Picnic areas
- Battlefields
- Parks, playgrounds
- and school yards
- Ploughed fields
- Beaches
- Piers
- Your own backyard!

If you're a Gold Prospector...

Do your research on historic goldfields in your target area as gold may be hiding in:

- Tailings from gold mine sites
- Old diggings (areas where prospectors dug for gold in the 1800s)
- In or near streams where gold can be panned
- Dry – blowing locations (usually in arid areas where water was scarce)
- Old reef mine dumps and slopes

GO-FIND 20

(Part # 3231-0001)

Enjoy fun and adventure with the GO-FIND 20. It's the perfect metal detector for finding coins, jewellery and even treasure. It's awesome fun for the whole family!

- Collapsible
- Lightweight
- Easy to use [2 modes]
- Waterproof coil
- VFLEX technology

GO-FIND 40

(Part # 3231-0002)

Cell phone not included

Adventure and discovery are right beneath your feet with the GO-FIND 40. It searches deeper and recovers the treasures other have missed. It's great value with advanced features!

- Collapsible & Lightweight
- Easy to use [3 modes]
- Large waterproof coil
- Treasure View LEDs
- Pinpointing
- Smartphone App [standard functions]
- VFLEX technology

GO-FIND 60

(Part # 3231-0003)

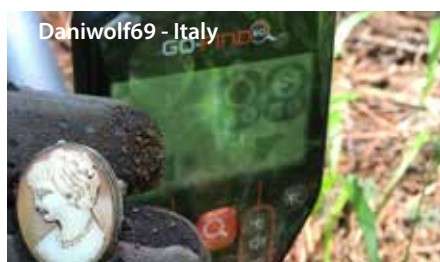

Cell phone not included

Step up to the power and performance of the GO-FIND 60. With precision control and maximum depth, you'll be an expert in no time. Start searching for treasure today!

- Collapsible & Lightweight
- Easy to use [4 modes]
- Large waterproof coil
- Treasure View LEDs
- Pinpointing
- Smartphone Pro App [Pro functions]
- Digging tool, smartphone holder and earbuds included
- VFLEX technology

Pack a GO-FIND for your next trip, it's awesome fun for everyone!

X-TERRA 305

(Part # 3704-0107)

Packed with value and features, the X-TERRA 305 is a great choice for any individual or family looking to begin a detecting adventure.

- Easy to use - switch on and go!
- Tell good targets from junk
- Customisable Notch Discrimination
- Adjustable Ground Balance setting (manual 0-20)
- VFLEX Technology
- (2 frequencies - 7.5 kHz, 18.75 kHz)

X-TERRA 505

(Part # 3705-0113)

Looking for more performance? The X-TERRA 505 is an improved ADVENTURE detector with all the X-TERRA 305 features and more.

- Easy to use - switch on and go!
- Tell good targets from junk more accurately
- Customisable Notch Discrimination
- Adjustable Ground Balance setting (manual 0-50)
- Improved depth
- VFLEX Technology
- (3 frequencies - 3 kHz, 7.5 kHz, 18.75 kHz)

X-TERRA 705

(Part # 3706-0122)

The X-TERRA 705 is the most advanced and versatile ADVENTURE detector configured especially for coin, treasure and artefact hunting.

- 2 detectors in 1!
- Easy to use - switch on and go!
- Coin & Treasure Mode - tell good targets from junk with the highest accuracy
- Accurate Ground Balance options to 'see through the ground'
- VFLEX Technology
- (3 frequencies - 3 kHz, 7.5 kHz, 18.75 kHz)

Safari

(Part # 3218-0119)

Ask about the great value Safari Pro Pack
(Part # 3218-0116)

The Safari is an easy to use mid-level TREASURE detector with enhanced multi-frequency technology and discrimination. This detector is great for high performance treasure hunting.

- Switch on and go detecting
- Find more valuable treasure, dig even less junk!
- Accurate audible and visual pinpointing
- Lightweight, waterproof 11-inch Double-D coil
- FBS technology

E-TRAC

(Part # 3228-0002)

The E-TRAC offers you superior performance and enhanced 2D Discrimination for precision target identification.

- Switch on and go detecting
- Smartfind 2D Discrimination (35 x 50 = 1,750 segment target resolution)
- Lightweight, waterproof 11-inch Double-D coil
- Xchange - USB connection to PC
- FBS technology

Excalibur II

(Part # 3303-0102 for 8" coil)
(Part # 3303-0106 for 10" coil)

The Excalibur II has industry leading multi-frequency technology in a rugged waterproof housing. This detector is great for land-based through to extreme underwater detecting.

- Robust design - go detecting anywhere!
- Classic detecting simplicity
- Find more treasure, dig less junk!
- Waterproof to 200 ft
- Auto and Manual Sensitivity
- BBS and RCB technologies

CTX 3030

(Part # 3228-0101)

The CTX 3030 is a waterproof, all-terrain TREASURE detector designed to give you ultimate performance in any landscape.

- Waterproof 10 ft - take it anywhere!
- More treasure, less junk with the ultimate FeCo discrimination
- No need for a separate GPS
- PC Mapping (with Google Maps)
- Latest Minelab technology- FBS 2, GPSi & Wi-Stream

XChange2

Designed specifically for the CTX 3030, XChange 2 allows you to store and retrieve detecting data, and also display this on Google Maps. It has never been easier to keep track of your detecting adventures and plan your next hunt. For more information about the CTX 3030 and XChange 2, visit www.ctx3030.com

X-TERRA 705 Gold Pack

(Part # 3706-0123)

Ask about the great value X-TERRA 705 Dual Pack

(Part # 3706-0117)

The X-TERRA 705 Gold Pack is the most advanced and versatile ADVENTURE detector configured especially for gold prospecting.

- 2 detectors in 1!
- Easy to use - turn on and go!
- Lightweight - you can swing all day
- Iron mask - block out unwanted iron target (nails)
- Prospecting Mode - the perfect detector to start your next goldfields adventure
- Automatic tracking Ground Balance options to remove ground noise and work with stable signal
- VFLEX Technology
- (3 frequencies - 3 kHz, 7.5 kHz, 18.75 kHz)

Eureka Gold

(Part # 3316-0005)

The Eureka Gold is a classic, easy to use GOLD detector with three frequency options and automatic ground balance capabilities. This detector is great for prospecting in mildly mineralized ground.

- Classic gold prospecting simplicity
- Find more gold, dig less iron junk!
- Audio options
- ACCU-TRAK Automatic Ground Balance Tracking
- VLF and 3F technologies

GPX-4500

(Part # 3300-0001)

The GPX-4500 offers proven field result, it offering all of the great features and high performance you have come to expect from a Minelab PI technology detector.

- Easy to get started
- 6 Timings in 1 advanced detector: *Enhance, Normal, Sensitive Smooth, Salt Course, Sensitive Extra & Sharp.*
- Automatic Ground Balance Tracking options
- 11-inch Double-D coil
- MPS, DVT and SETA technologies

Chip - USA

Dean - Australia

Diogo Minelab - Brazil

SDC 2300

(Part # 3230-0001)

Find elusive sub-gram nuggets on land & underwater!

- Compact, Folds to small portable size, 216 x 400mm.
- Fully submersible to 3m underwater
- Military grade construction, No assembly required.
- Find those elusive gold bearing clustered deposits.
- MPF technologies

GPX 4800

(Part # 3300-0301)

The GPX 4800 is an advanced GOLD detector. It has the GPX Depth Advantage, giving you great depth performance in most ground conditions.

- Easy to get started
- 6 Timings in 1 advanced detector:
Enhance, Sensitive Extra, Normal, Salt-Coarse, Sharp, Coin/Relic
- Automatic Ground Balance Tracking options
- 11-inch Double-D coil
- MPS, DVT and SETA technologies

GPX 5000

(Part # 3300-0401)

The GPX 5000 is the most advanced GOLD detector available. This unbeatable detector will give you the GPX Depth Advantage, for the ultimate gold prospecting performance in all ground conditions.

- Easy to get started
- 8 Timings in 1 superior detector:
Enhance, Sensitive Extra, Normal, Salt/Gold, Sharp, Sensitive Smooth, Fine Gold, Coin/Relic
- Automatic Ground Balance Tracking options
- Precision adjustments for maximum performance
- Supplied with two coils: 11-inch Double-D and 11-inch Monoloop
- MPS, DVT and SETA technologies

GPZ 7000

(Part # 3301-0001)

The GPZ 7000 is the future of gold detection. This unbeatable detector will give you extreme gold depth (up to 40%* deeper than the GPX series), for the ultimate gold prospecting performance in all ground conditions.

- Extreme gold depth
- Maximum gold sensitivity
- Precision Ground Balance
- Enhanced noise cancel
- Simple menu system
- Wireless audio
- GPS locating & PC mapping
- 14-inch waterproof coil to 3 ft
- ZVT, Super-D, GPSi and Wi-stream technologies

Model	Detecting Purpose	Supplied Coil	Search Modes	Discrimination Segments	Ground Balance	Soil Timings	Wet condition
GO-FIND 20	Coin & Treasure	8" Monoloop	Coin & Treasure	2	Auto	-	1 drop

Excalibur II	Coin & Treasure	8" or 10" Double-D	Manual	Manual	Pre-set	-	3 drops
CTX 3030	Coin & Treasure	11" Double-D	10 (5 factory & 5 Custom)	2D (1750)	Auto Track*	-	3 drops
X-TERRA 705 Gold	Gold Prospecting	10" x 5" Double-D	Coin & Treasure Prospecting	28	Auto Track* Manual* (0 - 90)	-	1 drop
Eureka Gold	Gold Prospecting	10" x 5" Double-D	All Metal / Disc	Ferrous /Non-Ferrous	Auto Track* (3 Speeds)	-	1 drop
GPX-4500	Gold Prospecting	11" Double-D	6	Ferrous /Non-Ferrous	Auto Track* (3 Speeds)	6	1 drop
SDC 2300	Gold Prospecting	8" Mono	Normal & Salt	Ferrous /Non-Ferrous	Auto Track* Fast GB	-	3 drops
GPX 4800	Gold Prospecting	11" Double-D	3	Ferrous /Non-Ferrous	Auto Track* (3 Speeds)	6	1 drop
GPX 5000	Gold Prospecting	11" Double-D and 11" Mono	6	Ferrous /Non-Ferrous	Auto Track* (3 Speeds)	8	1 drop
GPZ 7000	Gold Prospecting	14" Super-D	3 gold + 3 ground	Ferrous /Non-Ferrous	Auto & Manual	-	1 drop

Waterproof (fully submersible)

Waterproof coils only - exclude control box.

Submersible to 1 meter. Ideal for shallow water wading and gold prospecting in shallow streams.

Water resistant: Must not be submersed under water. May be splashed, washed, used in drizzling rain, or moved through wet grass.

*See Definition

Manual: Ground Balance is set manually

Auto Track: the detector continuously checks and changes to compensate for changes in ground mineralisation.

Automatic: the detector is set in balance with the ground automatically
