Safari

With a Safari, you can detect anywhere, anytime. Its FBS technology uses an extended range of multiple frequencies, along with Automatic Sensitivity and Ground Compensation. This enables you to detect in a wide range of ground types from parks to salt water beaches.

The high resolution notch discrimination scale, Target ID numbers and Tone IDs make it easy to identify targets and automatically reject junk. The Trash Density function improves performance in high trash areas where coins, artefacts and jewellery are close to unwanted targets.

Minelab uses the best technology to hide the most complex tasks behind the scenes, making detecting with the Safari so easy!

Specification:

Length	Adjustable from 1100 mm to 1370 mm
Shipping Weight	6 lbs (2750g) excluding batteries
Detector Weight	3.6 lbs (1650g) excluding batteries
Coil	11" lightweight, waterproof, Double D
Ground Rejection	Auto Ground Compensation - advanced digital filtering
Discrimination	Linear (-10 to +40 discrimination options)
Custom Select Discrimination	Yes (-10 to +40)
Search Modes (Preset)	Coin, Jewellery, Relic, All Metal, Pinpoint (Normal)
Discrimination Patters	4 (Programmable/Save)
Noise Cancel	Auto (Scanning)
Sensitivity Adjustment	Fully Automatic/Manual (0-20)
Threshold	Adjustable (0-40)
Target Volume Adjust	Adjustable (0-20)
Trash Density	High/Low
Batteries	12V Alkaline Pack (8 x 1.5 AA - batteries not included)
Technology	Full Band Spectrum (FBS)
