

Eureka **GOLD**

Find more Gold, with the power of 3 frequencies

Features

- 3 Frequency selection, equivalent to 3 detectors in 1
- ACCU-TRAK™ automatic ground balancing sees through the ground
- Easy to use switch on and go detector
- Variable discrimination ignores iron junk
- Lightweight with ergonomic mounting options

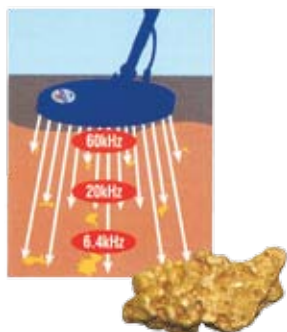

Versatile, powerful and easy to use gold detector

Eureka GOLD

With the traditional simplicity of knobs and switches you have an easily customisable gold detector, featuring:

- Signal Boost for making the nuggets louder
- Fine Signal for enhancement of faint nuggets
- Tone control for optimising the detector for your own personal hearing
- Sensitivity, Threshold and Volume controls for optimising to your conditions
- Headphone or Speaker
- Accessory coils

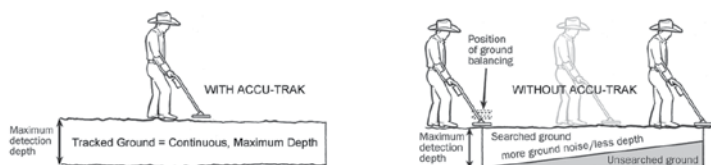

Technology Within 3F

The Eureka Gold gives you the versatility of 3 detectors in one machine with 3 frequencies available at the flick of a switch.

- 6.4kHz for maximum depth
- 20kHz for general detecting
- super sensitive 60kHz to find the smallest gold nuggets

ACCU-TRAK

ACCU-TRAK™ Automatic Ground Balance sees through ground mineralisation maintaining target detection depth, even in ground with variable mineralisation. With switchable 2 speed Ground Balance Tracking and variable discrimination you spend less time digging iron junk and more time digging gold.

"ACCU-TRAK" Ground Tracking gives you more depth!

Minelab Eureka Gold... has surprising depth capabilities which I was pleased to find, and with a reliable discriminator I can cover much more ground to dig those golden holes.

The 60 kHz frequency is deadly on those smaller nuggets the bigger machines leave behind. Lucky for me I'm not fussy, I'll take the big and the small, and if the bigger nuggets are there, the Eureka will more than accommodate for them too. This is a very easy machine to operate, even for a "Mug" like me...

Technical Specifications

Length	Adjustable from 47" (1190mm) to 53" (1350mm)
Detector Weight	4.8 lbs (2200g) excluding batteries
Coil	10" Double D Elliptical Goldsearch™ with Skidplate
Audio Output	Internal speaker or headphones (optional)
Headphone Output	¼" (6.3mm) stereo jack
Transmission	Very Low Frequency (VLF); 3 frequencies (6.4, 20 and 60 kHz)
Ground Balance	Accu-Trak™ Automatic Digital Ground Balancing (Auto & Fixed)
Tracking Speed	Fast & Slow
Controls	
On/Off Volume	Control 1 turn
Threshold	Control 1 turn
Sensitivity	Control 1 turn
Tone	Control 1 turn
Discriminate/All Metal	Switch 2 Pos
Discriminate Level	Control 1 turn
Balance	Switch 3 Pos
Frequency	Switch 3 Pos
Signal	Switch 3 Pos
Batteries	NiMH Rechargeable Battery System
Accessories	11" round Double D Round Goldsearch™, Alkaline Battery System, Car Battery Charger, Hip Mount Bag, Koss UR-30 and RPG headphones, Carry Bag
